# How Arrow Works!

Gutter Guards cover a gutter to keep debris out and let only water in. This professional grade gutter guard is made with a stainless steel screen and a metal support frame, with either fascia mount or under-the-shingle mount. Arrow is a professionally installed gutter guard. The raised V-screen channels handle high flow rain & shed debris more effectively. No more “cheap plastic frames” or “old-style flat screens.” Arrow’s high-tech design was built for better performance & ultra-low maintenance; Arrow Gutter Guard provides a lifetime of gutter & home protection.

*“I wanted a worry-free gutter system for my home and Arrow gutter guards are an attractive and functional gutter guard that works. I have referred several friends so far to Arrow gutter guards.”*

**- Susan B.**

*“We are very happy with the Arrow gutter guards that are keeping our gutters clean. We have a steep roof and Arrow gutter guards are catching all of the water.”*

**- Mark & Nancy T.**

*“I am very pleased with the look and performance of my Arrow gutter guards.”*

**- Jan H.**

- ①** Makes your gutters last longer by keeping them clean & protecting them from dry rot.
- ②** Protects fascia & roof wood from water & rot caused by clogged gutters.
- ③** Protects home foundations by allowing flowing gutters to properly divert water away.
- ④** Safety & peace of mind. No more climbing ladders
- ⑤** Improves your home's appearance and increases its value.
- ⑥** Handles high flow water caused by deep roof valleys.
